UPDATE REPORT:

BY THE DIRECTOR OF ENVIRONMENT & NEIGHBOURHOOD SERVICES READING BOROUGH COUNCIL ITEM NO. 11 PLANNING APPLICATIONS COMMITTEE: 18 July 2018

Ward:CavershamApp No.:181035/FULAddress:The Heights Primary School, 82 Gosbrook Road, Caversham, ReadingProposal:Fencing off an area of the Westfield Park Recreation Ground for educationaluse during school hours for use by the Heights Primary School.

RECOMMENDATION AMENDED TO:

GRANT Planning permission.

1. ADDITIONAL INFORMATION

1.1 The Council's Ecologist has advised that there are no objections to the application.

1.2 CADRA, GLOBE, the CPDA: no responses to advise of at the time of writing.

1.3 It is not clear from the plans (as the gates are a dull colour), but for confirmation, three access gates are shown on the plans. The enclosed area will be fully accessible to the public, if they wish, outside of the stated times, as set out in the main report. Signage to indicate this would be supplied.

2. UPDATE ON OBJECTIONS RECEIVED

2.1 The final number of objections and other representations received will be reported to your meeting. The table below seeks to provide a response to all other objection points which are not considered to have been responded to in the main report.

Objection	Officer response
How long will the grass last? What then, lay tarmac?	This is a detailed maintenance consideration for the applicant and the Leisure and Recreation Service, no tarmac is proposed.
Have all associated costs been borne in mind, eg. maintenance and child supervision?	Not a planning consideration
Why can't the area just be used for the School without fencing at all? School use the park for PE already occurs and this takes up a much greater area anyway, so do not see the point of this	A school playground is required within a contained area
This is a business that runs a school and	This is a Free School and has requirements

should not take open space	for a playground space to be provided, which cannot be provided at the 82 Gosbrook Road site.
We need more open space in Caversham when the air quality is so poor.	The Council's Environmental Protection team does not identify a reduction in air quality attributable to this planning application
Should have a fence which is used for the school and removed at the end of each school day	This is not understood to be a suitable solution for the school and a demarcated, retained area is required.
It will lead to an increase in traffic	No concerns for additional traffic generation from the Highway Authority
Object to using the park for purposes which are not what the paid upkeep of the park is for	Park maintenance is not a direct planning consideration
Concerned that the proposal will create arguments or uncomfortable nature of children playing near to where people are relaxing	This is a usual occurrence in a public park
Was there not a covenant on this land?	Not a planning matter
The School is acting selfishly and is trying to make up for the planning errors they have made	No response
Other options have been considered and rejected and the public have not had a chance to see these	Consultation took place with Ward Councillors before application submission
The fence will create an alleyway at the side of the park	A 1.6m high temporary mesh fence is not considered to create an alleyway
There would be an adverse effect on biodiversity	No objection from the Council's Ecologist
Would not object if the school was permanent and serving the local catchment	No response
Spend more time formalising the site in Caversham heights	Planning permission is close to being issued
You should consider also the 300+ objections to the previous proposal	Each planning application is to be considered on its individual planning merits and objections to each application considered accordingly
Brings the area closer to traffic fumes on Gosbrook Road	No objection from the Environmental Protection team on air quality grounds and this is already a public park
An archaeologist has indicated that there is a cropmark in this area which is of significance	Berkshire Archaeology are considering this matter and officers will provide a verbal update at your meeting.
Tree canopies and roots would be affected	No objection from Council's Natural Environment Team (Tree Officer) to the proposal
Instead you should impose a 20 mile per hour speed limit, introduce a pelican crossing and instruct the school to use the already fenced off Christchurch Meadow	A contained playground is required next to the school site.
All those with children at the school knew there was no outside space when they chose	Not a planning matter

the school for their children and the school	
knew they had inadequate outside space	
when they offered places for 2018 entry.	
There is sufficient space in other local	This is not the position of the LEA, as set
schools to take children for the 2018 entry	out in the previous report on application
without having to spend more public money	180552.
on extending this school.	
This application is totally unacceptable and	Not a planning document and therefore not
goes against the Reading 2050 charter that	considered to be relevant to the planning
councillors have signed up to.	assessment.
Not a shady area and site can become	Considered to be suitable for the intended
waterlogged	purpose by the School and the LEA.
It is also a shame that you are not as open	No response.
to providing funds to the local Schools that	·
actually need the additional funding rather	
than wasting money on temporary solutions	
for The Heights.	
If this planning application was shown by t	Condition recommends t
If this planning application goes ahead it is	Condition recommended.
imperative that it is written into the	
documentation that the fencing is taken	
down and the park restored to its current	
state by 1st October 2020	
The Environment Agency is trying to reduce	There is no tarmac proposed and there is no
flood risk in the area. Replacing grass with	objection from the Environment Aegncy
tarmac will contradict this.
