# Background

**Royal Berkshire**  
NHS Foundation Trust

- The government Health Infrastructure Plan (HIP) provides funding for new hospital projects over the next ten years.
- RBFT is one of 21 Trusts to receive seed funding to develop ideas for new hospital facilities.
- We have developed a Strategic Outline Case for the Treasury.
- All redevelopment possibilities are being considered.
- This is a major opportunity for the NHS and for our local communities to improve services, improve patient experience and improve the environment.

## Possible scenarios

- *Do nothing – addressing only the most high-risk backlog maintenance*
- *Do minimum – addressing more backlog maintenance*

Compassionate

Excellent

# Possible scenarios

- *New Emergency Care Block – expanded A&E, new ICU, new theatres*

- *New Emergency Care Block plus new Elective Care Block and new women's and children's facility – grow clinical services, better address developing local needs*

# Possible scenarios

- Substantially new hospital on the current site – supports growing demand, greater integration of health and care services, medical school and research centre.

- Completely new hospital on a greenfield site – could address all local needs and provide the blank canvas for a zero-carbon health facility.

## Pros and cons we are considering...

- Adjacencies – ensuring the services that need to be near each other are co-located.
- Environment – developing an environment which is green and low-carbon.
- Economy – developing a hospital which supports the local economy and creates jobs.
- Compliance – considering which scenario ensures greatest compliance with modern safety guidelines.
- Cost – developing the most cost effective scenario.
- Convenience – considering which scenario can be easily and conveniently delivered.

## Critical features of our case...

Thames Valley – home to one of the world’s largest **life sciences** clusters – critical in the fight against coronavirus and future pandemics.

We are an “**anchor institution**” in our local community.

## Next steps

- Strategic Outline Case submitted (December 2020).
- Continuing engagement with our stakeholders (local authorities, patients, staff, other stakeholders).
- Next steps... Outline Business Case and then Full Business Case.
