Recommendation	As per main report
S106 Terms	As per main report
Conditions	As per main report
Informatives	As per main report

1. Amended Plans Received

- 1.1. Since publication of the main agenda report amended plans for the application have been submitted. The only change shown on the amended plans is removal of a metal grid structure to the north elevation of the building which was proposed to provide a frame for climbing plants over this elevation as a design feature. However, following discussions with the Council's Natural Environment Officer concerns have been raised regarding access, maintenance and management challenges of such a feature, given it would be located on a shared boundary (north boundary shared with The Butler Public House). Furthermore, given the feature was proposed to be located to a north-facing elevation this would not create ideal conditions for such a feature to become established and could become a negative design feature of the development. Therefore, officers advised that this feature should be removed from the proposed plans.
- 1.2. No other changes to the proposed development are shown on the amended plans. Officers are satisfied that the street-level and roof top landscaping, as well as green/blue roof, proposed as part of the development are adequate for a development of this size in terms of soft landscaping provision and that removal of the climbing plant feature from the north elevation does not change the officer recommendation for the application, which remains as per the main agenda report.

- 1.3. The list of submitted plans and documentation submitted with the application from paragraph 3.8 of the main agenda report is amended as follows (deletions ~~crossed through~~ and additions in *italics*):
