

Appendix HCVEA-2

Project / Proposal Name or Reference:		Date:	Your Name:	
Review of Hackney Carriage Vehicle Emissions & Age Policy		30-May-24	Rob Abell	
1. IMPACT ON CARBON EMISSIONS				
HOW WILL THIS PROJECT/PROPOSAL AFFECT:	CONSIDERATIONS <i>See guidance below on determining whether negative or positive impacts are High, Medium or Low</i>	IMPACT? <i>Use drop down list</i>	GUIDANCE IF NEGATIVE/NIL RATING HAS BEEN AWARDED	SUMMARISE HOW YOU PLAN TO MANAGE AND REDUCE ANY NEGATIVE IMPACTS
1 ENERGY USE	<ul style="list-style-type: none"> * More energy will be consumed or emissions generated (by RBC or others) = Negative Impact * No extra energy use is involved or any additional energy use will be met from renewable sources = Nil Impact * Energy use will be reduced or renewable energy sources will replace existing fossil fuel energy = Positive Impact 	Medium Positive	Consider: <ul style="list-style-type: none"> - Energy efficiency measures - Renewable energy - Reducing demand for energy 	Pausing the policy permitted around 100 vehicles which should have come off the fleet to remain on until 1 October 2023. That permitted the continuing generation of emissions that would have otherwise been reduced. By re-implementing the requirement and incentive to change to more environmentally friendly vehicles it will lead to older
2 WASTE GENERATION	<ul style="list-style-type: none"> * More waste will be generated (by RBC or others) = Negative Impact * No waste will be generated = Nil Impact * Less waste will be generated OR amount of waste that is reused/recycled will be increased = Positive Impact 	Nil	Consider: <ul style="list-style-type: none"> - Re-usable/recycled goods - Recycling facilities - Reducing/reusing resources 	N/A
3 USE OF TRANSPORT	<ul style="list-style-type: none"> * RBC or others will need to travel more OR transport goods/people more often/further = Negative Impact * No extra transport will be necessary = Nil Impact * The need to travel, the use of transport and/or of fossil fuel-based transport will be reduced = Positive Impact 	Nil	Consider: <ul style="list-style-type: none"> - Use of public transport - Reducing need to travel or transport goods - Alternative fuels/electric vehicles/walking and cycling 	The recent unmet demand survey means that the numbers of Hackney Carriage vehicles licensed will remain the same.

2. IMPACT ON RESILIENCE TO THE EFFECTS OF CLIMATE CHANGE					
HOW WILL THIS PROJECT/PROPOSAL AFFECT THE ABILITY OF READING TO	CONSIDERATIONS <i>See guidance below on determining whether negative or positive impacts are High, Medium or Low</i>	IMPACT? <i>Use drop down list</i>	GUIDANCE IF NEGATIVE/NIL RATING HAS BEEN AWARDED	SUMMARISE HOW YOU PLAN TO MANAGE AND REDUCE ANY NEGATIVE IMPACTS	
4	HEATWAVES	* Increased exposure of vulnerable people and/or infrastructure to heat stress = Negative Impact * No increase in exposure to heat stress = Nil Impact * Reduced exposure of vulnerable people and/or infrastructure to heat stress = Positive Impact	Low Positive	Greater need for cooling, ventilation, shading and hydration methods	The policy will lead to a gradual improvement to the carbon footprint of the Hackney Carriage fleet which will have a positive impact on global warming.
5	DROUGHT	* Water use will increase and/or no provision made for water management = Negative Impact * Levels of water use will not be changed = Nil Impact * Provision made for water management, water resources will be protected = Positive Impact	Nil	Greater need for water management and perhaps reserve supplies	N/A
6	FLOODING	* Levels of surface water run-off will increase, no management of flood risk = Negative Impact * Levels of surface water run-off & flood risk are not affected = Nil Impact * Sustainable drainage measures incorporated, positive steps to reduce & manage flood risk = Positive Impact	Nil	Consider flood defence mechanisms or alternative arrangements (business continuity)	N/A
7	HIGH WINDS / STORMS	* Exposure to higher wind speeds is increased or is not managed = Negative Impact * No change to existing level of exposure to higher wind speeds = Nil Impact * Exposure to higher wind speeds is being actively managed & reduced = Positive Impact	Nil	Greater need for stabilisation measures, robust structures resilient to high winds	N/A
8	DISRUPTION TO SUPPLY CHAINS	* Exposure to supply chain disruption for key goods and services is increased = Negative Impact * No change in exposure to supply chain disruption for key goods and services = Nil Impact * Exposure to supply chain disruption for key goods and services is reduced = Positive Impact	Nil	Source key goods and services locally as it reduces exposure to supply chain disruption and boosts the local economy	N/A
<p>Weighing up the negative and positive impacts of your project, what is the overall rating you are assigning to your project?:</p>			<p>Net Low Positive</p>	<p><i>This overall rating is what you need to include in your report/ budget proposal, together with your explanation given below.</i></p>	

Guidance on Assessing the Degree of Negative and Positive Impacts:

Note: Not all of the considerations/ criteria listed below will necessarily be relevant to your project

Low Impact (L)	* No publicity
	* Relevant risks to the Council or community are Low or none
	* No impact on service or corporate performance
	* No impact on capital assets; or relates to minor capital assets (minor works)
Medium Impact (M)	* Local publicity (good or bad)
	* Relevant risks to the Council or community are Medium
	* Affects delivery of corporate commitments
	* Affects service performance (e.g.: energy use; waste generation, transport use) by more than c.10%
High Impact (H)	* Relates to medium-sized capital assets (individual buildings or small projects)
	* National publicity (good or bad)
	* Relevant risks to the Council or community are Significant or High
	* Affects delivery of regulatory commitments
	* Affects corporate performance (e.g.: energy; waste; transport use) by more than c.10%
	* Relates to major capital assets (larger buildings and infrastructure projects)

In the box below please summarise any relevant policy context, explain how the overall rating has been derived, highlight significant impacts (positive and negative) and explain actions being taken to mitigate negatives and increase positives. This text can be replicated in the 'Environment and Climate Impacts' section of your Committee Report, though

We are reinforcing the need for hackney carriage vehicles to move towards ULEV. Pausing to the original policy, due to the economic and transport changes caused by the Covid-19 pandemic, has now ceased so we can start having a positive impact again on the reduction of carbon emissions.
