### Below barchart shows the trend in Estimated Forecasts with Net Weighted Risks per month.

### Narrative Commentary - Period 6

- The forecast revenue outturn for the General Fund on service budgets (excluding the Brighter Futures for Children position BFfC) is for a net overspend of £561k. This represents a forecast overspend of £643k within the DEGNS directorate offset by modest forecast underspends within DACHS (£3k) and DoR (£79k). This represents an improvement from the previous month forecasts of £87k previously being £648k.
- The principal element contributing to the forecast DEGNS (£500k) is an under-achievement of anticipated commercial property income as due diligence on ptential purchases has, to date, not identified appropriate assets to acquire.
- In addition to the service area forecast year-end variance, potential emerging risks or opportunities are also monitored, and weighted according to potential of materialising over and above the forecasts reported in paragraph 1. Net service area risks, again excluding the BFfC position total net weighted opportunities of £9k. Should these materialise in addition to the forecast discussed above, the outturn would move to a £552k overspend.
- The BFfC forecast for this monitoring statement is based on Period 5 data due to the contractual delay in their reporting timeframes. Their latest forecast is for a £1,651k overspend by year end a £76k deterioration from that reported in last month's overall monitoring position. In addition to this forecast, weighted net risks are identified, an increase of £170k from previously reported. The forecast BFfC overspend predominantly relates to cost of agency staff and pressures on Looked After Children budgets. Should all risks materialise by year-end, the overall outturn position for BFfC budgets would be £2,451k.
- The total service area forecast for the year (including BFfC) is for a total £2,212k overspend against budget. This would rise to £3,002k if all weighted risks were to additionally materialise.
- In addition to service area budgets, the Council has a number of corporately held budgets which includes risk and contingency provisions held to mitigate any potential service area overspends or delays in delivering agreed savings. A forecast underspend on these budgets of £4,979k is currently forecast an improvement of £619k over the previous month. As the year progresses risks diminish (being incorporated into service area forecasts) and anticipated use of contingencies reduces. In addition, upsides against the Council's originally forecast Business Rate Pilot Pooling arrangments have emerged and (as in previous reporting periods) been included in the net Corporate Items forecasts.
- 7 Incorporating the Corporate Items forecast with that of the service areas would produce a year end outturn forecast of a £2,767k underspend this would be rolled into General or Earmarked Reserves at year end and be used to bolster the Council's overall financial resiliance or be available to fund future revenue expenditure. Should all weighted risks identified also materialise, the overall projected surplus would reduce to £1,976k
- The Council's Net Budget Requirement of £132,804k is principally financed from Council Tax and Business Rates. Accounting regulations ensure that the in-year budgeted total is exactly reflected in the outturn position, and as such no in-year variance is forecast for this funding.
- The Housing Revenue Account (HRA) is forecasting an underspend of £6,890 at the end of Period 6 an increase of £148k on that reported in Period 5. The overall forecast comprises £2,690k in major works; £400k of additional income; and £3,800k of lower in-year capital financing charges. Any surplus would be transferred to HRA balances to provide funding to support HRA spend in future years.

### Narrative Commentary

- 10 The General Fund Capital Programme has been sub-divided between general capital spend and those budgets that were specifically set aside for future investment should suitable investment opportunities that were self-funding to become available (and subject to individual business cases and due diligence).
- 11 Against the general category of capital expenditure, the General Fund is forecasting a net overspend in year of £3,856k. The principal causes of this forecast relate to the provision of loan financing to Reading Transport Ltd to purchase Courtney Coaches (£5,200k) offset by a reprofiling of £1,140k of vehicle replacement spend into future years.
- 12 Within the investment opportunity category of General Fund capital, a change to the business model of Homes for Reading means they no longer require funding of a net £24,720 this year. Additionally, £114,718k of financing to acquire property as part of the Council's Property Investment Strategy is re-profiled to future years. The market continues to be reviewed for potential suitable acquisitions and should opportunities arise, the forecast would change.
- 13 The HRA capital programme is forecasting a net underspend against current year budgets of £3,713k, predominantly relating to slippage in the New Build and Acquisitions programme of £5,808k.
- Delivery of the Council's budget is predicated on achieving savings and efficiencies as agreed as part of the budget setting process in February 2019. Detailed monitoring of agreed savings is tracked on a monthly basis. As at the end of Period 6, £8,449k of the overall £12,720k savings being tracked are categorised as either blue or green (£4,144k blue already delivered; £4,305k green on track). A further £731k are R-A-G rated as amber and £3,540k as red. Since Period 5, blue savings have increased (improved) by £1,582k; green savings decreased by £1,162k (a logical consequence of items moving from green to blue); and amber savings decreased by £421k. Savings rated as red have increased by £1k.

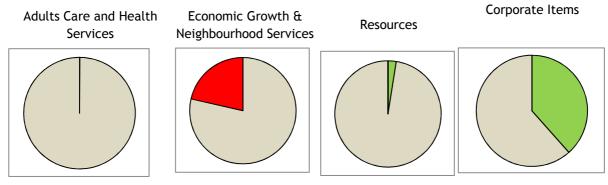

Details of performance regarding sundry debt collection; purchase to pay compliance; and use 15 of agency staff is set out to the rear of this report.

### Savings 2019-2020 - End of September 2019

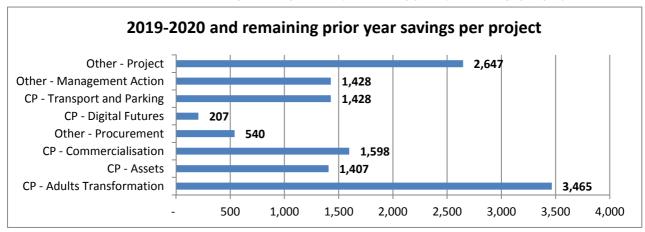

The below graphs shows the outstanding 2018-19 unachieved savings and 2019-20 savings programme. This totals £12.720m for the overall council, including £3.161m worth of savings not achieved during prior years.

The next graph shows the current RAGB rating per directorate as at September 2019 and the percentage per area.

The Council has created delivery projects that have individual savings attached for review and to assist implementatic The data below shows the 2019-2020 budget savings and any remaining prior year savings per project.

# Debt Performance - End of September 2019

The pie chart below shows the sundry debt as at the end of Period 6 (in excess of 30 days old) to total £9.468m compared to £11.188m at the end of Period 5.

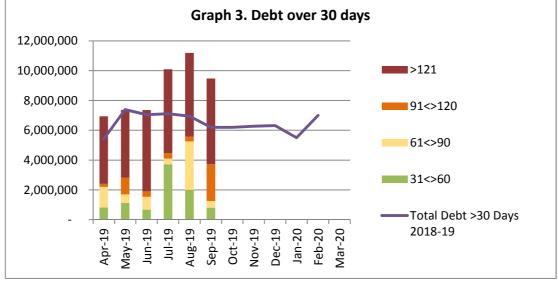

Pie Chart 2 (below) shows the split of debt over 30 days old (Breakdown of the £10.1m)

Note: Community Care includes Adult Client debt and invoices relating to NHS/CCG. As of Period 6, debt has been secured against 5 properties which totals £0.473m, however there is no guarantee that 100% of this is recovered upon sale of the property. Education Services includes the majority of Schools service level agreement invoices.

Graph 3. Debt over 30 days 12,000,000

Graph 3 shows the trend of debt over 30 days for 2019-2020 financial year.

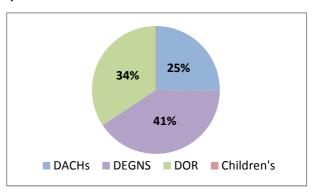

Debt over 121 days old has increased by £0.118m to £5.733m since the end of period 5.

### Agency and Staffing - End of September 2019
